I have an aspiration to help many people in my life in any way possible. I am striving to become a software engineer and change the future of the Internet world drastically because that is where our future is headed to. I have a really creative mindset and love doing things different than others. I'm really hard working and will always completely devote myself to the job at hand. I am able to do anything even if I'm not sure how to because I will learn. I truly believe knowledge is one of the most valuable things a person can have.

---

## Education

*W.D. Career Center -*

*Internet Business, Customer Service, & Information Technology (2014 - 2019)*

While throughout High School I was studying in the internet business path. Here I learned and have been certified in both internet business and customer service. I also dabbled in C# via an online course in school. While in my computer technology class I learned a vast amount of computer science and the java programming language.

*Ovey Comeaux -*

*Web Development & Web Design (2016 - 2017)*

For a year I studied and worked on HTML & CSS creating school projects. This including making websites, stand-alone pages, and much more for my school. I achieved top of my class and worked alone on more advanced HTML5 than others because of my true passion of code and skill level.

*TeamTreeHouse*

*Front-End Web Development (2019 - Present)*

*I am currently studying and going towards my tech degree in front-end development. This is a online course that I have already mastered my html and css tracks. This tech degree includes, HTML, CSS, & Javascript.*

---

## Projects/Experience

*Third-Party Gaming Servers (2014 - 2019) (Java)*

- *Worked for numerous third-party game servers consisted of 10's of thousands of concurrent users*
  - *Used Ubuntu Servers for hosting, MySQL & MongoDB for storage, Java for backend*
  - *Often deployed projects live to tens of servers at a time on a network with thousands*
  - *Worked with multi-functional times from front and back end developers, java developers, system administrators, sales associates, support representatives, etc.*
- 

## Skills

*Languages*

Java(5 years), SQL(3 years), HTML(2 years), CSS(2 years), Lua(1 year), Javascript(1 year)
